

REMOTE CUSTOMER SUPPORT

RCS SERVICE LEVELS

AMACO Remote Customer Support is a real-time, high-quality technical support solution where AMACO experts are instantly available via video using Remote Guidance Software and will support you with technical advice and guidance.

This technology does not require any pre-installation and can be used with any mobile device with a camera or with smart glasses for a hands-free service solution for even faster problem-solving.

AMACO Remote Customer Support is not only support solution in case of errors but also supporting our customers when they are doing inspections on their own or providing user and maintenance trainings for the employees onsite.
